

First Circular ICOPE-2023

International Conference on Power Engineering-2023

May 21-26, 2023. Kyoto International
Conference Center, Kyoto, Japan

Organized and Sponsored by
The Japan Society of Mechanical Engineers

Co-organized by
The Chinese Society of Power Engineering
and
The American Society of Mechanical Engineers

Objective

The conference aims to provide a platform for promoting collaborations among professional societies and enhancing the technical exchanges in the power engineering community regarding thermal power, distributed energy system including heat and power utilization, energy storage, renewable energy, environmental issues including low-carbon, CCS (Carbon dioxide Capture and Storage), CCUS (Carbon dioxide Capture, Utilization and Storage) and waste to energy, and the other energy-related topics. Hydrogen is expected to be a key fuel for energy storage of variable renewable energy, low-quality coal utilization, and low-carbon energy systems. CCUS is attracting attention as a bridging technology. The conference will be held in Kyoto, a famous ancient city where an innovative CCS is demonstrating.
